To the Collector of the Customs —

Sir —

An order to ascertain and estimate the damage on One hundred and forty Boxes Sugar imported by Lorenzo Pierce in the Bark Addison whereof Peleg Crowell is master from a Whaling voyage — is respectfully requested —

Dartg New Bedford

Jan. 2 1848 — Lorenzo Pierce

I Lorenzo Pierce do solemnly swear that I have personally inspected and examined the merchandise described in the foregoing application to the Collector of the Customs.; — that the same has sustained damage on the voyage of importation, and has not been landed ten days from the vessel in which the importation was made.

So help me God —

Lorenzo Pierce

Sworn to this 2 day of

April 24th 1868 this Doctor Recommend at Barbadoes for pains in Sit stomach & spirites turpentine to be rub'd on the parts & Senda pepermint Sulp & other Billious Pills take

FARMER'S PAINT.—Farmers will find the following profitable for house or fence paint—Skim milk, two quarts; fresh-slacked lime, eight ounces; linseed oil, six ounces; white Burgundy pitch, two ounces; Spanish white, three pounds. The lime is to be slacked in water, exposed to the air, and then mixed with one-fourth milk; the oil, in which the pitch is dissolved, to be added, a little at a time; then the rest of the milk, and afterwards the Spanish white. This was sufficient for twenty-seven yards, two coats. This is for a white paint. If desirable, any other color may be produced; thus, if a cream color is desired, in place of part of the Spanish white, use the ochre alone.

MANY men and women have sad occasion to know that two do not necessarily make a pair.

A FIRE PROOF AND WATER PROOF CEMENT.—To half a pint of milk put an equal quantity of vinegar, in order to curdle it; then seperate the curd from the whey, and mix the whey with the whites of four or five eggs, beating the whole well together. When it is well mixed, and a little quick lime, through a sieve, until it has acquired the consistence of a thick paste. With this cement broken vessels and cracks of all kinds may be mended. It dries quickly, and resists the action of fire and water.

APPLE CUSTARD.—To make the cheapest and best every day farmer's apple custard, take sweet apples that will cook, pare, cut, and stew them; when cool, stir till the pieces are broken; when cool, thin with milk to a proper consistency, and bake with one crust like a pumkin pie. Eggs may be prepared and added with milk, if handy, though it will do without. No sweetening is necessary. It may be seasoned with any kind of spice to suite the taste the less the better.

C. R. SHERMAN & CO.,

—AT THEIR—

NAVIGATION STORE,

NO 49 NORTH WATER STREET,

(Corner of William,)

NEW BEDFORD,
